

## GENERAL HANDLING

- Your fabric graphic should always be handled in a clean, dry area with clean hands. When possible, use white fabric gloves.
- Be sure fabric is clean and dry before packaging.
- Machine washing and/or drying is not recommended for all fabrics. Refer to chart below for which fabrics are machine washable.

## EMERGENCY STAIN TREATMENT

For dry stains, like loose dirt or pencil marks, initially try using masking tape or a dry (not moistened) Magic Eraser.

- Masking tape or a dry Magic Eraser can be quite effective at lifting dry surface dirt. Try “pulling” as much of the stain away as you can. Avoid rubbing the stain into the fabric.

Introduce water or liquid cleaner for stains not responsive to masking tape or dry Magic Eraser.

- When using liquids to treat stains, if possible, treat the stain with the fabric off of the frame.
- Place a clean, dry cloth behind the stain to absorb the stain while being treated. Moisten another cloth initially with just water (distilled water is optimal, if available).
- Gently blot the stain with moistened cloth (or small area of moistened Magic Eraser), while trying to push the stain through to the back - using the dry cloth to absorb.
- Repeat, using care to keep the wet area as small as possible.

*Grandma's Secret Spot Remover* can be an effective stain remover. Mix several drops with clean water in a small cup and repeat the above technique, taking care to keep wet area as small as possible and using a dry cloth behind the stain to absorb.

## MACHINE WASHING FABRIC GRAPHICS

- Cold water/delicate cycle/tumble dry low or air dry. For stretch fabrics do not use dryer - let it hang dry.
- Use caution on dryer time with graphics containing liners. It is best to put tension fabric on its frame when it is still damp and let it air dry. Always be sure that the frame is clean when mounting the damp graphic.
- Fabric stretch graphics that are washed and machine dried may shrink up to 3/4” per every 50” of fabric in the direction of the stretch, and up to 1/4” in the non-stretch direction.

## STEAMING FABRIC GRAPHICS

- For optimal results, steam wrinkles when fabric is tensioned and installed securely on the frame.
- Fill steamer with clean drinking or distilled water. Avoid using water containing hard minerals.
- Hold steamer upright and close to the fabric. Avoid touching the fabric with the steamer.
- Do not tip steamer, as water drips may cause marks to form on the graphic.
